Module 5

Political Action for Climate Advocacy

Co-funded by
the European Union

Program

(see curriculum)

- 1 What is climate advocacy?
- 2 The primary cause of climate change
- 3 Climate change effects
- 4 Collaborative / Individual Action
- 5 Future Sustainable Planning
- 6 Political Actions

https://youtu.be/QG9ZcsL4INc?si=z4BjcgrkrSu3_4iQ

Learning objectives

(see curriculum)

- To explore the barriers to effective climate policies
- Work in teams to design a youth-led campaign addressing a specific issue
- Learn how to engage with political systems
- Identify ways to influence climate policies
- Create a roadmap for long-term youth engagement in climate action

1. What is climate advocacy ?

Why is Earth Overshoot Day important?

Explanation

1 Earth

EarthOvershoot Day

1971 - 2024

1.75 Earths

Based on National Footprint and Biocapacity Accounts 2023 Edition

Country Overshoot Days 2025

When Earth Overshoot Day would land if all the people around the world lived like...

Explanation

What is in the European Green Deal ?

CLIMATE

Becoming the first climate neutral continent by 2050
Fit for 55 Package, CBAM

ENERGY

A clean and efficient energy transition
Fit for 55 Package

INDUSTRY

An industrial strategy for a competitive, green and digital Europe
Batteries Regulation, Plastics Strategy

ENVIRONMENT AND OCEANS

Protecting our biodiversity and ecosystems
Circular Economy Action Plan, Chemicals Strategy for Sustainability,
Zero Pollution Action Plan, Waste and Recycling

AGRICULTURE

A healthy food system for people and the planet
Farm to Fork Strategy, Organic Farming Action Plan

TRANSPORT

Providing efficient, safe and environmentally friendly transport

FINANCE AND REGIONAL DEVELOPMENT

Sustainable investments to deliver the EU Green Deal
Corporate Sustainability Reporting Directive, EU Taxonomy

3. Climate change effects

END

SOCIAL AND ECONOMIC IMPACT OF CLIMATE CHANGE

The cost of adapting coastal areas to rising sea levels

Relocation of whole towns

Loss of the capacity to work due to heat

Shrinking productivity of harvests

More wars to gain access to limited resources

Prices of basic foodstuffs and consumer goods will rise

Fresh water will be in short supply in some areas

Extreme meteorological phenomena will cause widespread poverty

Diseases will spread due to higher temperatures

Causes and Effects of Climate Change

Causes

- Rapid industrialization
- Energy use
- Agricultural practices
- Deforestation
- Consumer practices
- Livestock
- Transport
- Resource extraction
- Pollution

Effects

- Rising temperatures
- Rising sea levels
- Unpredictable weather patterns
- Increase in extreme weather events
- Land degradation
- Loss of wildlife and biodiversity

What are the social impacts of climate change?

Displaced people. Poverty. Loss of livelihood. Hunger. Malnutrition. Increased risk of diseases. Global food and water shortages.

4. Collaborative / Individual Action

ACTION

Puzzle

RAISING THE ALARM

THE BLOCKER

Whether **calling** for a climate strike, **'blocking'** fossil fuel deliveries and projects or **joining** direct action in solidarity with others to stop 'business as usual', you are done waiting. Climate action now!

THE INFLUENCER

You get the word out. Parents, cousins, friends, friends of friends beware. You **shape the conversation** by **sharing**, **analysing** and **summarising** the debates, the struggles and challenge the deniers (and delayers) head on.

THE DEFENDER

You promote **human rights** and **speak out** against the harm done to people or the planet through the exploitation of land and natural resources by businesses and governments for profit. Your **defender toolkit** includes **awareness-raising protest**, **peaceful direct action** and **filing legal complaints**.

WORKING THROUGH THE DETAILS

THE SCIENTIST

Tracking changes, **scenario building** and **gathering evidence** are your superpowers. As a **Student**, **novice**, **lab technician**, **sleuth** and **researcher**, you dig for evidence so that activists working at kitchen tables or in board rooms have the **proof** needed to push for change.

THE CONDUCTOR

We can't do this alone. You are a **people person** and always include others. **The revolution will be organised** and led by you. You have cups of tea and post-it notes. The supply chains we use and our impact on people and the planet will be reviewed. You've got this.

THE REFORMER

Using law, policy opportunities and putting pressure on decision makers you **'dance with the system'** so as to change it from the inside out. You eat 200-page UN policy reports for breakfast.

BRINGING SOLUTIONS HOME

THE ENGINEER

You invent, pioneer technology, learn through improving and testing. You are a **master in moving from theory to practice**. One solar panel installation, carbon storage facility or nature-based solution at a time.

THE CULTURE JAMMER

You paint the climate emergency, sing the rallying call and produce the posters, t-shirts and stories **that light the soul of a movement towards a just world**. And stickers.

THE INVESTOR

You put your money, or your organisation's money, where your climate justice heart is. Divesting from fossil fuels, **shareholder activist** that you are, means that **you invest** in ideas and projects that support a transition towards a **low carbon future for everyone, near and far**.

THE VISIONARY

Building a better, more just and more sustainable world starts with imagining one. Adapting and **combining proposals**, leading ideas for **public ownership** and **public infrastructure**, not simply private profit. **You build the future, today**.
